Applicant has shown evidence that the portion of WO 99/05108 relied on in the rejection, was invented by Dr. Glen T Cunkle. However, claims 1-5 are broader than the elected species and are obvious over the other compounds disclosed in WO 99/05108, e.g. the other compounds disclosed on pages 4-54 and 56-69. A claim drawn to the elected species would not have been obvious over the art of record.

It is noted that WO 99/05108 also issued as U.S Patent 6,254,724. This Patent has an effective date of July 23, 1997 and discloses the same compounds in column 25, lines 43-45. This patent is not available under 102 (e) for a claim drawn to the species invented by Applicant, e.g. the species (a) –(i) and (I) disclosed in column 25 and invented by Dr. Cunkle.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-5 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over WO 99/05108.

Art Unit: 1731

The claimed genus is the same or obvious over the species disclosed by WO 99/05108. This rejection will be dropped if the claims are limited to the elected species.

Claims 1-5 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over SELTZER et al (6,254,724).

The claimed genus is the same or obvious over the species disclosed by SELTZER et al. This rejection will be dropped if the claims are limited to the elected species.

This case appears to be related to other Applications and or Patents, e.g. Patent No. 6,254,724. Are there any other Applications or Patents that disclosed the claimed invention?

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 1731

Claims 1-5 are rejected under the judicially created doctrine of double patenting over claims 1-41 of U. S. Patent No. 6,254,724 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: The claimed genus is the same or obvious over the species claimed by SELTZER et al. This rejection will be dropped if the claims are limited to the elected species.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

The claimed species are the same or obvious over the species disclosed by SELTZER et al. This rejection will be dropped if the claims are limited to the elected species.

This case appears to be related to other Applications and or Patents, e.g. Patent No. 6,254,724. Are there any other Applications or Patents that disclosed the claimed invention?

This action is properly made final, as SELTZER et al is the U. S. equivalent of WO 99/05108. This rejection was necessary due to the filing of the 132 rejection that would overcome the rejections with respect to the claimed species.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Art Unit: 1731

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
